

ODONG NOAH

Full Stack Software Developer & IT Support Professional

noahodong6@gmail.com | +256 768182448 | github.com/odong-noah | linkedin.com/in/odong-noah-6028bb3a8 | Mutungo, Kampala, Uganda

PROFESSIONAL SUMMARY

A highly motivated Full-Stack Software Developer and IT Support Professional based in Uganda, holding a Bachelor's degree in Software Engineering from Mbarara University of Science and Technology. Proven track record in building high-quality, secure, and scalable web and mobile applications using modern frameworks and cloud technologies. Experienced in enterprise IT infrastructure management, network security, and system administration. Adept at resolving complex technical issues while ensuring 100% system uptime, data integrity, and exceptional end-user experience. Passionate about clean code, developer experience, and seamless interfaces that work beautifully across every device.

WORK EXPERIENCE

Full Stack Developer

April 2026 – May 2026

Sparrow Systems UG | Part-Time | Entebbe, Uganda

- Developed a web-based Media Asset Manager application enabling image and video upload with cloud-based transformations such as resizing, cropping, and filters via Cloudinary.
- Wrote comprehensive technical documentation covering the organisation's coding house standards in Markdown to streamline developer onboarding and reduce knowledge gaps.
- Collaborated within a cross-functional team, managing tasks and delivery timelines using Git version control and structured code review workflows.

Skills: Vanilla JavaScript, Bootstrap CSS, PHP, MySQL, Cloudinary, Git, Markdown

IT Support Officer & Software Developer

June 2025 – March 2026

St. Peter's S.S Naalya | Full-Time | Kampala, Uganda

- Provided direct technical assistance to over 100 staff members and stakeholders, resolving hardware and software incidents within established service level agreements.
- Architected a custom, secure, and user-friendly school website on WordPress CMS, implementing SSL certificates, plugin-based security hardening, and a structured content management system.
- Administered Google Workspace for Education, managing secure digital identities, user provisioning, and access controls for a large-scale institutional user base.
- Monitored local network connectivity and troubleshooted router and switch issues, ensuring uninterrupted access to institutional resources.
- Maintained an updated IT asset inventory and performed routine preventive maintenance of servers and enterprise computing environments.

Skills: WordPress CMS, PHP, CSS3, Google Workspace, Network Security, Root Cause Analysis, Technical Support

Embedded Systems Intern

June 2024 – August 2024

Fundibots | Internship | Mbarara, Uganda

- Engineered a web-based IoT attendance system integrating microprocessors and biometric scanners, performing hands-on hardware troubleshooting and performance optimisation.
- Built real-time dashboards to monitor sensor data streams and automate hardware responses via RESTful API endpoints.
- Conducted rigorous quality assurance and code reviews to ensure system stability and data integrity across all connected IoT devices.
- Prepared technical reports and system configuration guides to support ongoing maintenance of embedded systems infrastructure.

Skills: Arduino, MicroPython, Node.js, REST APIs, IoT, JavaScript, Git

Software Engineer Intern

September 2023 – October 2023

CAMTech Uganda | Internship | Mbarara, Uganda

- Developed and shipped features for live client projects using React, React Native, and Laravel, contributing directly to production codebases.
- Optimised algorithms for computational efficiency, improving application response time and overall system performance.
- Contributed to the design and development of a VoiceBot application, incorporating natural language processing (NLP) capabilities into the mobile interface.

Skills: React Native, React, Laravel, PHP, Algorithms, NLP, Git

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Python, PHP, Dart, HTML5, SQL, Kotlin
Mobile:	React Native, Flutter, Firebase, SQLite, Supabase
Frontend:	React.js, Next.js, Bootstrap CSS, Tailwind CSS, Django
Backend:	FastAPI, Node.js, Laravel, RESTful APIs, JWT, Microservices
Databases:	MySQL, PostgreSQL, MongoDB, Firebase Realtime DB, SQLite
DevOps:	Git, GitHub Actions, Docker, Kubernetes, Jenkins, Linux, CI/CD
Design & PM:	Figma, Notion, ClickUp, Cloudinary

PROJECTS

St. Peter's Naalya School Website

WordPress CMS, PHP, CSS3, Web Security, SSL

Collaborated on the design and deployment of the official school website for St. Peter's Naalya Secondary School (spena.sc.ug), serving as the institution's primary digital presence. The site covers admissions, academics, co-curricular activities, news, fees structure, and community engagement. Applied SSL certificates, custom plugin-based security hardening, and role-based content management to ensure a clean, user-friendly, and secure experience for students, parents, and staff.

Mobile Authentication System

React Native, TypeScript, Laravel, PHP, Firebase Realtime Database, SQLite

A production-ready mobile authentication system enforcing email verification to ensure only valid addresses are stored in the database, thereby preventing unauthorised access. Supports secure password reset via OTP codes delivered to verified email addresses. Leverages Firebase Realtime Database for live authentication state management and SQLite for seamless offline support, backed by a robust Laravel PHP API.

Media Asset Manager

Vanilla JavaScript, HTML5, Bootstrap CSS, PHP, Cloudinary, MySQL

A web-based media management platform allowing users to upload images and videos, then apply custom transformations — including resizing, cropping, and filters — directly within the browser. Built with a Vanilla JavaScript and Bootstrap frontend, PHP backend, Cloudinary for cloud media storage and transformation processing, and MySQL for storing structured references to all uploaded assets.

Crop-Advisor App

React, Tailwind CSS, AI/ML, MicroPython

An intelligent crop recommendation application that analyses real-time weather conditions (rainfall, temperature, humidity) and soil nutrient levels (Nitrogen, Potassium, Phosphorus) to recommend the most suitable crops for a given farm. The system returns a primary crop recommendation alongside two alternatives, with results exported as a structured PDF report for farmers and agronomists.

Portfolio Website

Next.js, React, CSS Modules, FormSpree, Vercel

A personal developer portfolio built with Next.js, featuring server-side rendering, smooth animations, and a fully responsive layout across all screen sizes. Showcases projects, technical skills, and work experience, with integrated contact functionality powered by FormSpree. Deployed and hosted on Vercel for fast, reliable global delivery.

EDUCATION

BSc Software Engineering

Feb 2021 – May 2025

Mbarara University of Science & Technology | Mbarara, Uganda

Uganda Advanced Certificate of Education (A-Level)

2019 – 2020

Bishop Cipriano Kihangire Secondary School | Kampala, Uganda

Uganda Certificate of Education (O-Level)

2014 – 2018

Bishop Cipriano Kihangire Secondary School | Kampala, Uganda

REFEREES

Madam Sonia Letaru

Human Resource Manager, St. Peter's S.S Naalya
